

This is the first published audio covering basic doctrines. The study covers the definition of inspiration and preservation, what originals and copies are, the reasons why our scriptures are both inspired and preserved, the verses that prove inspiration and preservation, the arguments of critics concerning the originals, why copies can be inspired, the problem with inspiration only to originals, the meaning of double inspiration, why our scriptures can be inspired twice with differences, and verses that prove double inspiration. Multiple Baptist scholars cannot even grasp the basic doctrines of inspiration and preservation. They fiercely argue that our King James Bible cannot be inspired while the long-lost originals are. However, we Christians do have the inspired words of God in our hands today. This book is the final authority of our faith, and if it has errors, then our Christian faith has no supporting proof-text. Here are the most common verses that clearly show the words of God being inspired and preserved for today.
