

Ever since God created a mate for man back in Genesis 2, the Lord knew that humans needed fellowship. Mankind cannot live as well without anyone to socialize with. The devil knows this, and that is why he uses the fellowship of the world to corrupt Christians. What is sad is that the saints are separating from the fellowship with God's children and fellowshiping with the world that God separated. This study will cover questions such as: Isn't it important to socialize with others? Is it wrong to have fun and to party? Why must I come to every meeting in church? Does fellowship really help in expanding the ministry? Do I have to separate from saved people who are from different denominations? Are there verses proving that I will get influenced by the world if I associate with them? Must I completely avoid my lost friends, family members, and business associates? Do I have to separate from Christians who are in the same belief as I am, except minor differences? If so, then in what point must I separate from them? If not, then in what point must I maintain fellowship with them?
