

This subject will explain once and for all why we believe what we believe. The reason why we believe the existence of God, the reality of heaven, the flames of hell, the wickedness of homosexuality, the errors of socialism, intolerance of religions, rejection of secular education, and avoiding philosophy is because what the Bible says. Whatever view is being taught, Christians reject them once it contradicts the word of God. Even if a scientist, historian, or scholar finds some "evidence" to disprove our faith, the believer throws that out and goes by the scriptures no matter what. Throughout periods of time, the Bible always stood true while man always proved to be wrong over and over again. This study will cover questions such as, "How can we rely the Bible above science, history, and scholasticism?" "What if a scientist, historian, or scholar has some evidence against my faith?" "Are there really cases proving the brilliance of scholars and textbooks to be undependable?" "Shouldn't I rely more upon what I see than what I cannot see?" "How can I believe for certain that my Bible is undoubtedly true?" "Wasn't the Bible written by ordinary men, so how can I believe it to be the words of God?" "Are there scientific evidences proving the Bible to be the word of God?" "What are the historical discoveries that support the Bible to be the words of God?"
