

Out of all the studies, this one will make the audience appreciative of the Book that is available in our hands. There are hundreds of thousands of literary works in our world, yet all these combined can never outmatch the King James Bible. It is the only book in all of history that has been sold with literally billions of copies. However, it has been also one of the most neglected books to read. People will spend more time reading the TV Guide, comics, mangas, magazines, and romance novels. How can they read what is practically junk when the value of the scriptures is so high in containing the very words of the Almighty God? This study will cover questions such as, "Where was it written?" "Isn't it a Book containing different or contradictory opinions of various writers?" "Does the Bible only apply to the religious?" "Is it really considered a literary masterpiece or a dull writing to secular scholars?" "What's so amazing about the preservation of the Bible?" "What kind of symbols does the Bible represent?" "Why do we have to preach the Bible?" "Can a person get saved by faith without the Bible?" "How can I clean the filth in my life so that I can draw closer to holiness?"
