

The Bible is the word of God, because science has always backed up the Bible while doctors, scholars, philosophers, mathematicians, navigators, scientists, and mankind contradicted science or did not discover the scientific facts before the Bible. I recommend the website audience to watch "Science and the Bible" from Pastor Schreib's sermon videos for further points.

- The Bible said the earth is in the shape of a circle, “It is he that sitteth upon the circle of the earth” (Isaiah 40:22). But the king’s own elected navigators during the days of Columbus thought it was flat.

- The Bible said the earth rotates upon its axis, “The earth...is turned as clay to the seal” (Job 38:13-14). It wasn’t until thousands of years later that Galileo and others finally discovered that the earth rotates.

- The Bible said the earth hangs on nothing in space, “He...hangeth the earth upon nothing” (Job 26:7). But famous “brilliant” Greek scholars and philosophers thought the earth was held by a muscular man or some other being.

- The Bible said the stars cannot be numbered, “The host of heaven cannot be numbered, neither the sand of the sea is measured” (Jeremiah 33:22). But famous “brilliant” Greek scholars and mathematicians (like Hipparchus and Ptolemy) counted 1,022 or 1,026 stars. No mathematician today can still count the stars.

- The Bible said the atmosphere has weight, “...to make weight for the winds” (Job 28:25). It wasn’t until the 17th century that scientists finally discovered that the atmosphere has weight.

- The Bible said the blood sustains life, “For the life of the flesh is in the blood” (Lev. 17:11). But during Washington’s death, the president’s own elected doctors thought that there was “bad blood” in Washington and bled him to death.

- The Bible said the universe is running down, “The earth...and the heavens...shall wax old like a garment” (Psalm 102:25-26). It wasn’t until thousands of years later that a fixed scientific law (not questionable theory) called the Second Law of Thermodynamics was discovered.

- The Bible said the sea has paths, “...and whatsoever passeth through the paths of the seas” (Psalm 8:8). Matthew Maury (professional U.S. naval officer) believed the Bible and discovered that there were indeed ocean currents traveling in specific paths. Through his expertise of that information, he made many charts on the Atlantic, Pacific, and Indian oceans. As a result, those who followed his charts were able to cut down their sailing time considerably.

- The Bible gave detailed descriptions of hand sanitation concerning eating, touching dead carcasses, and handling diseases (Leviticus 11:32-15:33). During operation, American surgeons would not wash their hands after touching a patient; as a result, it brought death to many patients. During the Black Plague in Europe, thousands died due to lack of sanitation; but

the Jews were the only ones in good health due to following the Levitical Law.

Science texts have made mistakes before, but the Bible is the science text that has always been proven true despite of what men thought. Humans who live according to science have no idea that the God of science has given them a scientific book that truthfully explains their destiny. The Bible is the word of God that needs to be accepted as scientific truth.
