

Jehovah's Witnesses firmly hold to the belief that after death a soul falls asleep, then at the final day of Judgment that soul will be either cast into the lake of fire and become extinct or reign on a heavenly earth. According to the word of God, that view of the afterlife is completely wrong. As Bible-believers already know, we will immediately go to Heaven after we die. It is that simple. It is a fantastical tale that souls fall asleep in the bodies or that souls will disappear once in the lake of fire. However, Jehovah's Witnesses claim that the scriptures support their view of the afterlife. They use several verses to make their arguments and re-interpret the verses that do show an eternal hell-fire. In this audio, the audience will be able to grasp a good understanding and necessary tools to successfully prove that soul sleep is a lie and hell is a literal place of eternal torment. Their false interpretations will also be easily proven wrong according to the plain and simple interpretation found from the Bible itself, not from the biased ways of men. Furthermore, their so-called textual evidences will be proven to be out-of-context. Numerous verses will be given to prove clearly that a soul immediately departs from the body at the afterlife and that a soul truly burns forever in hell without dying.
